

Bio

Greetings! I am John Hanley.

<https://www.linkedin.com/in/jhanley714>

In the 20th century I helped Oracle and Yahoo build large systems for serving the burgeoning masses of internet clients.

Welcome to the 21st century. I hope you're enjoying it. Lately I have worked as a Researcher at Xerox PARC (the storied Palo Alto Research Center), and as Senior Data Scientist at REX, a real estate startup.

I use python.

With any luck, you do, too!

(Currently seeking new opportunities – you or your manager might reach out.)
